**Re: International Conference "Modern Pharmacotherapy in Urology", 20-21 May 2004,
Khabarovsk, Russia**

Dear colleagues,

On behalf of the Interregional Association for Clinical Microbiology and Antimicrobial Chemotherapy (IACMAC), we would like to express the gratitude for your contribution to the conference "Modern Pharmacotherapy in Urology", 20-21 May 2004, Khabarovsk, Russia.

The conference was extremely successful. It involved over 450 specialists. The audience was presented by over 500 participants from 15 regions of Russia and 50 participants from Korea, Japan, Israel, Germany, USA, Switzerland. Overall, foreign speakers have given 19 lectures and 11 lectures were given by Russian speakers.

Taking into consideration far distance between Khabarovsk and Moscow, National organizing committee location we failed to avoid some technical and organizing imperfections. In connection with this we wish to offer our sincere apologies and we'll be very much obliged for your censorious remarks and suggestions.

On the whole the conference appeared to be a unique possibility for Russian and foreign specialists to listen to expert lectures and present up-to-day information of pharmacotherapy in urology. The speakers provided solutions and recommendations rather than just review current situation.

We hope that this first experience was of a great value and such international conferences in the Far East of Russia will become a good tradition.

Sincerely yours,

Prof. L.S. STRATCHOUNSKI

Organizing Committee, International Conference "Modern Pharmacotherapy in Urology"
