

JOURNAL OF THE ISC

INTERNATIONAL JOURNAL OF Antimicrobial Agents

The ISC publishes its own scientific Journal, *International Journal of Antimicrobial Agents*, in conjunction with Elsevier Science. In twelve issues a year it provides comprehensive and up-to-date peer reviewed reference information on the physical, pharmacological, in vitro and clinical properties of individual antimicrobial agents (antiviral agents, antiparasitic agents, antibacterial agents, antifungal agents, immunotherapeutic agents, etc.).

In addition, the journal signals new trends and developments in the field through highly authoritative review articles on antimicrobial agents, immunomodulators and immunotherapy.

RECENT AND FORTHCOMING TOPICS

Special issues have recently or will shortly be published on the following subjects:

- Pk/Pd
- Antibiotics and pneumococci
- Urinary tract infection
- Travel infection

SUBMIT A PAPER

Reviews and original research articles are welcome - special attention is given to those providing insight into the problems of antimicrobial resistance, local as well as world-wide, both in the hospital and in the community. Papers on the underlying mechanisms and on immunomodulating agents are also accepted.

SPECIAL OFFER FOR ISC MEMBERS

Members of the ISC are eligible to subscribe to *IJAA* at a preferential rate -

\$85/€75 – only \$7 an issue!

Subscribe online or using the order form below to make sure you benefit from the latest news and reviews in the field.
